

## Quarterly wage rate index – 3rd Quarter, 2008

As from the first quarter of 2007, a new series of the quarterly wage rate index, based on the occupational structure of the working population in September 2006 has been introduced. An indicator giving movements in the index for the four quarters of a year is published during the first quarter of the following year. The indicator for 2007 was released in April 2008. To satisfy the requirements of the International Monetary Fund (IMF) towards graduation of Mauritius to the Special Data Dissemination Standard (SDDS), the index for a particular quarter will be posted on the website of the Central Statistics Office within the following quarter. The following gives the index for the 3<sup>rd</sup> quarter 2008. It is to be noted that the wage rate index measures changes in the price of labour, i.e. changes in the average rates actually paid by employers to their employees for work during normal working hours. The base period is September 2006.

1 Revised

2 The weights for 2008 have been changed slightly due to the shifting of establishments from one industry group to another

The wage rate index for all sectors together shows an increase of 18.7 points in the third quarter of 2008 compared to the second quarter of 2008. It is to be noted that all industry groups have registered increases in their wage rates during that period. The main contributors to the increase are “Public administration and defence; compulsory social security” (5.5 points), followed by

“Education” (4.1 points), ‘Health and social work’ (2.0 points) and “Agriculture, hunting, forestry and fishing” (1.4 points). The observed increases are mainly due to the implementation of the PRB report during the third quarter of 2008.

It is to be noted that, in addition to changes in basic salaries and wages, the index is also affected by changes in the mix of employees of various categories or with various lengths of service, e.g. intake of new recruits and the promotion of staff to higher grades.

Compared to the 3<sup>rd</sup> quarter 2007, the overall index for the 3<sup>rd</sup> quarter 2008 increased by 21.0% from 106.1 to 128.4.
