

## Press Communiqué

It is brought to the attention of all poultry keepers and to the public in general that it is imperative to vaccinate poultry (chicken, ducks, geese, quails) and other birds regularly to protect them from infectious diseases.

Poultry vaccines against Newcastle Disease and Fowl Pox are available at nominal price at all veterinary offices during office hours (8.45 –16.00 hrs) as per the list below.

For a complete monitoring of poultry activities in Mauritius and in view of future control in time of epidemic (e.g. Avian Flu), all poultry keepers (from back yard to industrial scale) are kindly requested to register themselves at any veterinary or AREU Extension office as per list below during office hours.

Pet bird owners are also requested to register themselves.
