## Standards Update

January 2011

2011-03-01

## 1.0 MSB in brief

1.1 The Mauritius Standards Bureau (MSB) is the national standards body for the Republic of Mauritius.

1.2 MSB develops and publishes voluntary national standards for products and services in a wide range of technical areas including management systems and conformity assessment standards.

1.3 MSB provides calibration, testing and certification services. It operates a voluntary certification marking scheme for products and processes (MAURICERT), HACCP certification, the National Management Systems Certification Scheme including Quality Management Systems (ISO 9000), Food Safety Management (ISO 22000) and Information Security Management Systems (ISO 27001). Moreover, it conducts training courses on quality management based on ISO 9000 for the public and private sectors.

1.4 MSB is also the National Enquiry Point for WTO TBT Agreement on Technical Barriers to Trade.

## 2.0 Standardization Work

2.1 The development of standards is carried out by consensus of all stakeholders grouped under various technical committees. There is a wide consultation process to secure comments on draft standards before these are published as Mauritian Standards.

2.2 MSB has a two-stage approach to developing standards, Standards Committees have been set up to oversee standards work in various technological areas, but detailed work on specific subjects is handled at the level of subcommittees. There are presently 13 Standards Committees and about 25 active subcommittees working on specific projects.

2.3 The objective of the Bureau is to harmonize the national standards with international or regional standards whenever these exist and are applicable.

2.4 The standards developed are voluntary; however, some Mauritian Standards have been referred in Legislation and are mandatory.

## 3.0 Stages in the development of a Mauritian Standard

The table below shows the 3 main sequential stages for the development of a Mauritian Standard and gives the name of the document associated with each stage:

	<b>STAGES</b>	<b>ASSOCIATED DOCUMENT</b>
<b>1</b>	Preparatory	Committee Draft (CD)
<b>2</b>	Consultation	Draft Mauritian Standard (DMS)
<b>3</b>	Finalization	Mauritian Standard (MS)

#### 4.0 Programme of work

4.1 MSB publishes a work programme for its standards development activities twice a year, in January and July, in the '**MSB Standards Update**'.

This work programme covers the period January to June 2011. It lists the standards, which are currently being developed, including the revision of published Mauritian Standards and those standards that had been developed during the period July to December 2010.

4.2 The work programme is available free of charge from the Standards Development Division of MSB. It can also be consulted on the website of the Bureau.

#### How to use this publication

1.0 Mauritian Standards published from July to December 2010

**Section A** gives the list of Mauritian Standards, in numerical order, published during the period July to December 2010.

1.1 Reference number

The number of the Mauritian Standard and the year of publication. The prefix **MS** stands for Mauritian Standard and **MS ISO** denotes that the Mauritian Standard is identical with an ISO standard. Mauritian Standards which are identical with other regional or foreign National Standards are represented by dual numbering including the MS reference number and the reference number of the adopted standard.

1.2 Title

The title of the Mauritian Standard.

1.3 Gazette notification

The date the Mauritian Standard was notified in the Government Gazette after approval by the Standards Council.

1.4 ICS number

Number, based on the International System for Classification of Standards, classifying the standards according to their subject matter.

1.5 Basis of the standard

The reference number of the international, regional or foreign national standard on which the Mauritian Standard has been based. The abbreviation **IDT** indicates that the Mauritian Standard is identical with the stated standard.

2.0 Standards under development

**Section B** lists the projects for each Standards Committee which have been approved for standardization including the revision of Mauritian Standards.

2.1 Reference number

The number of the Mauritian Standard under development or revision.

2.2 Title

The title of the Mauritian Standard under development or revision.

2.3 Stage

This is indicated by the document associated with the corresponding stage in the standard development process as given at p 2, clause 3.0.

The abbreviation **NWI** indicates a project which has been approved for standardization by the Standards Committee but the work at the subcommittee has not started yet.

2.4 ICS number

Number, based on the International System for Classification of Standards, classifying the standards according to their subject matter.

2.5 Basis of the standard

The reference number of the international, regional or foreign national standard which is being used for developing or revising the Mauritian Standard.

**SECTION A****MAURITIAN STANDARDS PUBLISHED July - December 2010**
